## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure is objected to because it exceeds the 150-word limit. Correction is required. See MPEP § 608.01(b).

The specification is objected to due for a confusing language on page 6 lines 31-22 where the applicant states, "in a longitudinal direction therof approximately lein a bow to form a slender plate shape." Clarification is needed.

The specification (claims and abstract included) is objected to, due to the word spacing being very small on various lines throughout the application making it hard to read and determine the individual words.

### ***Information Disclosure Statement***

The reference US 4,067,787 should numbered 4,067,487.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The applicant states that the elastic body can be attachably/detachably mounted to a shoehorn portion of a shoehorn. The examiner is

unclear as to what the applicant means by this, as the applicant declares the device in its entirety a shoehorn. Clarification is needed.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over NS Planning KK (JP 2002-719894) in view of Chaplin (US 6,221,034) in further view of Mori (JP 2006-280287). Planning illustrates in Figs. 1 and 2 a shoehorn with a grip section 1 and 2 that folds into two parts at a central location to reduce the length of the shoehorn by half. The shoehorn includes a backscratcher 4 located at one end of the shoehorn. Planning does not teach the hand having a bent shape in the longitudinal direction. Chaplin illustrates in Fig. 1 a backscratcher that includes a bent handle. It would have been obvious to one of ordinary skill in the art to combine the bent shape of Chaplin with the handle of Planning to provide a backscratcher that would be easier to use, due to the bent shape. Planning does not explicitly teach the use of an elastic body that is removable. Mori illustrates in Figs. 1-5 a backscratcher with an elastic body 6 for massaging that is detachable via the belt 8. It would have been obvious to one of ordinary skill in the art to combine the elastic body of Mori to the device of Planning/Chaplin to provide a backscratcher that also can function as a massager.

***Allowable Subject Matter***

Claims 2-3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Applicant teaches structure to the elastic body to allow for attachment to the shoehorn that is not shown in the prior art

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form PTO-892.
